A Theory of Content and Other Essays (Representation and Mind series) Jerry A. Fodor

This collection of new and previously published essays reflects the major research and thought of one of today's preeminent philosophers of mind. The first seven essays are philosophical pieces that focus on mental representation and the foundations of intentionality; they are followed by four psychological essays on cognitive architecture. In his eloquent introduction, Fodor shows how the two areas are thematically united and epistemologically related, highlighting his interest in finding alternatives to holistic accounts of cognitive content.
