#### **Lorraine Prinz:**

Playing with family in the park, coming to see the coastal world or hanging out with buddies is thing that usually you could have done when you have spare time, after that why you don't try thing that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Data Mining with Microsoft SQL Server 2008, it is possible to enjoy both. It is excellent combination right, you still desire to miss it? What kind of hang-out type is it? Oh occur its mind hangout people. What? Still don't obtain it, oh come on its called reading friends.

#### **Elisabeth Martinez:**

As a student exactly feel bored to help reading. If their teacher requested them to go to the library as well as to make summary for some book, they are complained. Just tiny students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore , this Data Mining with Microsoft SQL Server 2008 can make you truly feel more interested to read.

#### **Nicholas McNeal:**

What is your hobby? Have you heard that question when you got students? We believe that that problem was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you know that little person just like reading or as studying become their hobby. You need to understand that reading is very important as well as book as to be the matter. Book is important thing to incorporate you knowledge, except your current teacher or lecturer. You find good news or update about something by book. Many kinds of books that can you choose to adopt be your object. One of them is this Data Mining with Microsoft SQL

Server 2008.
