Risk Assessment and Decision Analysis with Bayesian Networks Norman Fenton, Martin Neil

Although many Bayesian Network (BN) applications are now in everyday use, BNs have not yet achieved mainstream penetration. Focusing on practical real-world problem solving and model building, as opposed to algorithms and theory, **Risk Assessment and Decision Analysis with Bayesian Networks** explains how to incorporate knowledge with data to develop and use (Bayesian) causal models of risk that provide powerful insights and better decision making.

- Provides all tools necessary to build and run realistic Bayesian network models
- Supplies extensive example models based on real risk assessment problems in a wide range of application domains provided; for example, finance, safety, systems reliability, law, and more
- Introduces all necessary mathematics, probability, and statistics as needed

The book first establishes the basics of probability, risk, and building and using BN models, then goes into the detailed applications. The underlying BN algorithms appear in appendices rather than the main text since there is no need to understand them to build and use BN models. Keeping the body of the text free of intimidating mathematics, the book provides pragmatic advice about model building to ensure models are built efficiently.

A dedicated website, www.BayesianRisk.com, contains executable versions of all of the models described, exercises and worked solutions for all chapters, PowerPoint slides, numerous other resources, and a free downloadable copy of the AgenaRisk software.

From reader reviews:

Willie Blackburn:

Information is provisions for anyone to get better life, information nowadays can get by anyone in everywhere. The information can be a information or any news even a concern. What people must be consider any time those information which is inside former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one the resource are convinced. If you obtain the unstable resource then you get it as your main information you will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Risk Assessment and Decision Analysis with Bayesian Networks as the daily resource information.

Eva Burton:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your moment to upgrading your mind talent or thinking skill perhaps analytical thinking? Then you are receiving problem with the book than can satisfy your small amount of time to read it because this time you only find book that need more time to be read. Risk Assessment and Decision Analysis with Bayesian Networks can be your answer given it can be read by you who have those short free time problems.

Florence Taylor:

This Risk Assessment and Decision Analysis with Bayesian Networks is fresh way for you who has curiosity to look for some information as it relief your hunger of knowledge. Getting deeper you onto it getting knowledge more you know otherwise you who still having little bit of digest in reading this Risk Assessment and Decision Analysis with Bayesian Networks can be the light food in your case because the information inside that book is easy to get by anyone. These books develop itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in e-book form make them feel tired even dizzy this book is the answer. So there is absolutely no in reading a book especially this one. You can find what you are looking for. It should be here for a person. So , don't miss the idea! Just read this e-book sort for your better life along with knowledge.

Tamara Reams:

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person including reading or as examining become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to add you knowledge, except your current teacher or lecturer. You find good news or update with regards to something by book. Many kinds of books that can you take to be your object. One of them is niagra Risk Assessment and Decision Analysis with Bayesian Networks.
