## **A romance through time**

If you're an Outlander fan, you will love this time traveller story as we follow Marion on her journey from our contemporary time, to 18th century England. When Marion decides to give her virginity to the hot popular guy on campus Blake Harington, she is thrilled that he does not think of her as overweight, as she always thought she was. Instead he desired her voluptuous curves and agreed to let her tutor him in the physics lab one evening. However, what they didn't know is that a rogue physics professor has been using the lab to conduct his own experiments after hours. Marion and Blake unwittingly get traversed across time, but when she wakes in 18th century England, Blake is nowhere to be found. Instead she finds herself in the barn of an arrogant and attractive older man who finds her presence suspicious. He takes her in but thinks she is a run away prostitute, and the confused and perplexed relationship between them becomes one filled with unrequited passion and unfulfilled desires. But will she ever return to her own time, and furthermore... will she want too?

Marion had stumbled upon a secret time machine that a University professor had been working on. She was lucky enough to stumble upon it and it worked. So began her adventures through time. When she finds that the machine is missing from campus, she finds out where it has been hidden away. Once again she uses it and finds herself in the past in Venice, Italy right in the middle of Carnavale. She is swooped up by a band of performing gypsies, who accept her and make her one of them, only she has to perform. Just when she thinks her adventure has become crazy, she catches the eye of a gorgeous Italian masked man who turns out to be the nephew of the prince. Will she show him what its like to be with an American? Or will she not take the risks of being so wanton in an unknown place in an unknown time, just to play it safe?
