Find Out What Scott Really Wrote Going back to the original manuscripts, a team of scholars has uncovered what Scott originally wrote and intended his public to read before errors, misreadings and expurgations crept in during production. Anne of Geierstein (1829) is set in Central Europe in the fifteenth century, but it is a remarkably modern novel, for the central issues are the political instability and violence that arise from the mix of peoples and the fluidity of European boundaries. With Anne of Geierstein, Scott concludes the unfinished historical business of Quentin Durward, working on a larger canvas with broader brush-strokes and generally with more sombre colours. The novel illustrates the darkening of Scott's historical vision in the final part of his career. It is also a remarkable manifestation of the way in which the scope of his imaginative vision continued to expand even as his physical powers declined. This new edit
