A Concise Course in Algebraic Topology (Chicago Lectures in Mathematics Series) J. P. May

Algebraic topology is a basic part of modern mathematics, and some knowledge of this area is indispensable for any advanced work relating to geometry, including topology itself, differential geometry, algebraic geometry, and Lie groups. This book provides a detailed treatment of algebraic topology both for teachers of the subject and for advanced graduate students in mathematics either specializing in this area or continuing on to other fields.

J. Peter May's approach reflects the enormous internal developments within algebraic topology over the past several decades, most of which are largely unknown to mathematicians in other fields. But he also retains the classical presentations of various topics where appropriate. Most chapters end with problems that further explore and refine the concepts presented. The final four chapters provide sketches of substantial areas of algebraic topology that are normally omitted from introductory texts, and the book concludes with a list of suggested readings for those interested in delving further into the field.

From reader reviews:

Leona Ferretti:

In this 21st one hundred year, people become competitive in most way. By being competitive currently, people have do something to make all of them survives, being in the middle of often the crowded place and notice simply by surrounding. One thing that oftentimes many people have underestimated the idea for a while is reading. Yep, by reading a guide your ability to survive improve then having chance to remain than other is high. To suit your needs who want to start reading some sort of book, we give you this A Concise Course in Algebraic Topology (Chicago Lectures in Mathematics Series) book as starter and daily reading reserve. Why, because this book is more than just a book.

Wilma Baca:

Reading a e-book tends to be new life style in this particular era globalization. With reading you can get a lot of information that may give you benefit in your life. Together with book everyone in this world can certainly share their idea. Textbooks can also inspire a lot of people. Many author can inspire all their reader with their story as well as their experience. Not only situation that share in the textbooks. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors on this planet always try to improve their talent in writing, they also doing some study before they write on their book. One of them is this A Concise Course in Algebraic Topology (Chicago Lectures in Mathematics Series).

Anita Cannon:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them loved ones or their friend. Did you know? Many a lot of people spent that they free time just watching TV, or even playing video games all day long. If you want to try to find a new activity that is look different you can read the book. It is really fun to suit your needs. If you enjoy the book that you read you can spent all day long to reading a e-book. The book A Concise Course in Algebraic Topology (Chicago Lectures in Mathematics Series) it is rather good to read. There are a lot of individuals who recommended this book. These people were enjoying reading this book. When you did not have enough space to bring this book you can buy often the e-book. You can m0ore simply to read this book out of your smart phone. The price is not too expensive but this book possesses high quality.

Christopher Williams:

As a pupil exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's internal or real their passion. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that studying is not important, boring as well as can't see colorful pictures on there. Yeah, it is being complicated. Book is very important in your case. As we know

that on this period of time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this A Concise Course in Algebraic Topology (Chicago Lectures in Mathematics Series) can make you truly feel more interested to read.
