Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2)

R. Grimshaw

Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2) R. Grimshaw

Ordinary differential equations have long been an important area of study because of their wide application in physics, engineering, biology, chemistry, ecology, and economics. Based on a series of lectures given at the Universities of Melbourne and New South Wales in Australia, Nonlinear Ordinary Differential Equations takes the reader from basic elementary notions to the point where the exciting and fascinating developments in the theory of nonlinear differential equations can be understood and appreciated.

Each chapter is self-contained, and includes a selection of problems together with some detailed workings within the main text. Nonlinear Ordinary Differential Equations helps develop an understanding of the subtle and sometimes unexpected properties of nonlinear systems and simultaneously introduces practical analytical techniques to analyze nonlinear phenomena. This excellent book gives a structured, systematic, and rigorous development of the basic theory from elementary concepts to a point where readers can utilize ideas in nonlinear differential equations.

From reader reviews:

Trisha Sherman:

In this 21st one hundred year, people become competitive in every way. By being competitive right now, people have to do something to make these people survive, being in the middle of the crowded place and notice by means of surrounding. One thing that often many people have underestimated the item for a while is reading. Sure, by reading a book your ability to survive boost then having chance to stand than other is high. To suit your needs who want to start reading a book, we give you this particular Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2) book as nice and daily reading e-book. Why, because this book is more than just a book.

Alice Lawson:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, and then why you don't try factor that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you have been ride on and with addition details. Even you love Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2), you can enjoy both. It is great combination right, you still would like to miss it? What kind of hangout type is it? Oh come on its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.

Dana Richardson:

Are you kind of stressful person, only have 10 or 15 minute in your day time to upgrading your mind ability or thinking skill even analytical thinking? Then you are experiencing problem with the book in comparison with can satisfy your short time to read it because this time you only find guide that need more time to be examine. Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2) can be your answer as it can be read by you who have those short time problems.

Dennis Utley:

Do you like reading a e-book? Confuse to looking for your preferred book? Or your book ended up being rare? Why so many question for the book? But virtually any people feel that they enjoy intended for reading. Some people likes examining, not only science book and also novel and Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2) or perhaps others sources were given understanding for you. After you know how the great a book, you feel want to read more and more. Science guide was created for teacher or students especially. Those textbooks are helping them to bring their knowledge. In other case, beside science book, any other book likes Nonlinear Ordinary Differential Equations (Applied Mathematics and Engineering Science Texts) (v. 2) to make your spare time far more colorful. Many types of book like here.
