Microbial Diversity and Biotechnology in Food Security

Microbial Diversity and Biotechnology in Food Security

The roles of microbes in agriculture, industry and environment have been the point of interest since long time for their potential exploitation. Although only a fraction of microbial diversity was accessed by microbiologists earlier for harnessing them owing to limited techniques available. The molecular techniques have opened new vistas to access the wide field of the unexplored microbes and their exploitation for useful genes and novel metabolites. Sincere efforts have been made in biotechnology using microbes leading to improve our life with respect to agriculture and people health.

This comprehensive volume covers different aspects of microbial biotechnology and its management in sustainable agriculture for food security and improved human health. The book comprises four sections: Endophytes and Mycorrhizae, Microbial Diversity and Plant Protection, Microbial Functions and Biotechnology, and Microbes and the Environment, which contain 53 chapters.

The book examines the aspects on endophytes and mycorrhizae, bioactive compounds, growth promoting microorganisms, disease management with emphasis on biocontrol, genetics of disease resistance, microbial enzymes, advances in potential of microbes and their industrial as well as pharmaceutical applications. In addition, the use of botanicals, and the etiology and management of medicinal and aromatic plants in the post harvest management have been reviewed in greater depth for the benefit of teaching and research community.

The biotechnological developments using microbe potential have enabled us combat the environment and human health problems worldwide in ecofriendly manner. We are sure that this volume will be highly useful to all those concerned with fungi, bacteria, viruses and their biology, including environmental and public health officers and professionals in the field of interest. The volume is an exhaustive coverage of almost all the aspects of microbial biology and biotechnology.

From reader reviews:

Linda Pillar:

This book entitled Microbial Diversity and Biotechnology in Food Security to be one of several books in which best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy that book in the book retail store or you can order it through online. The publisher in this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Mobile phone. So there is no reason for you to past this guide from your list.

Andrew Waite:

The guide with title Microbial Diversity and Biotechnology in Food Security has a lot of information that you can discover it. You can get a lot of benefit after read this book. This specific book exist new expertise the information that exist in this e-book represented the condition of the world now. That is important to yo7u to find out how the improvement of the world. This particular book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Cheree Kramer:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Attempt to pick one book that you just dont know the inside because don't assess book by its deal with may doesn't work here is difficult job because you are scared that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer can be Microbial Diversity and Biotechnology in Food Security why because the wonderful cover that make you consider with regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or even cover. Your reading 6th sense will directly show you to pick up this book.

John Hawkins:

What is your hobby? Have you heard which question when you got pupils? We believe that that concern was given by teacher on their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person like reading or as looking at become their hobby. You have to know that reading is very important as well as book as to be the thing. Book is important thing to increase you knowledge, except your own personal teacher or lecturer. You will find good news or update in relation to something by book. Numerous books that can you decide to try be your object. One of them is Microbial Diversity and Biotechnology in Food Security.
