The book presents national, state, and local perspectives and up-to-date information, including the reorganization of the Department of Homeland Security, the renewed Patriot Act, and intelligence reform. A wide range of issues are discussed, including such topics as the effectiveness of terrorism, weapons of mass destruction, the measurement of terrorism, victims of terrorism, privatization of counterterrorism, the "code war," the merging of life safety and public safety, the Katrina disaster, the role of the military, preemptive force, Homeland Security and national security versus due process models, pandemics, and wars of globalization. It emphasizes practical issues handled by senior government officials, private sector executives, security practitioners, and a variety of first responders.

Terrorism and Homeland Security provides theory from several disciplines, offering explanations of problems and countermeasures to assist both practitioners searching for answers, as well as students seeking to put theory into practice. Applications at the end of chapters use assessment center and red team techniques to help the reader develop analytical and decision-making skills in the context of understanding the mindset and planning processes of terrorists.
