The ANNALS of the American Academy of Political & Social Science: Toward Computational Social Science: Big Data in Digital Environments (The ANNALS of ... of Political and Social Science Series)

The exponential growth of structured and unstructured social data has confronted fields such as political science, sociology, psychology, information systems, public health, public policy, and communication with a unique challenge: How can scientists best use computational tools to analyze such data, problematical as they may be, with the goal of understanding individuals and their interactions within social systems? The unprecedented availability of information on discrete behaviors, social expressions, personal connections, and social alignments provides insights on a range of phenomena and influence processes — from personality traits to political behaviors; from public opinion to relationship formation — despite issues of representativeness and uniformity. This volume explores some of the key issues confronting researchers who pursue computational social science in the age big data.

Pamela Dodge:

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just little students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful images on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country.
